

**BURLINGTON SCHOOL DISTRICT
F 23: SPECIAL HEALTH PLANS**

Former Policy JHCF

Special health plans are used for students with predictable medical emergencies (e.g. food allergies, bee sting allergies, diabetes, severe asthma, seizures). Special health plans must be written with the understanding that health personnel are not always present in our schools and trained non-medical staff must be able to implement the plan. The Special health plan must be clear and very specific: steps that require medical assessment and judgment cannot be included. Special health plans must be renewed at least annually, or as the students medical condition indicates. The Certified School Nurse will ensure the development and implement the Special health plan.
